FOR IMMEDIATE RELEASE

**SCM Launches New Web Site: Redesigned to Offer Better Access, More Information, and Easier Navigation**

San Ramon, CA – February 25, 2005 – Safety Compliance Management, Inc. (SCM) unveils its new web site that offers more information on the environmental health and safety industry. The site, available by going to [www.scm-safety.com](http://www.scm-safety.com), uses a streamlined design so visitors can easily access SCM’s online training courses, its range of services, and up-to-date industry news.

“We wanted customers and prospects to connect with the information they need to make important decisions about environmental health and safety,” says David Woodard, Director of Operations for SCM. “Our new site more closely reflects who we are as a company, one that is easy to work with and that tailors its services to meet our clients’ needs.”

In addition to a streamlined design, the site gives visitors intuitive navigation tools that provide easier access to information. A direct link to SCM’s online training courses enables visitors to view courses or register and a new area offers press releases and current industry news.

“Anything a visitor wants regarding SCM, safety regulations, or industry information is now only a click away—available anytime, anywhere,” Woodard added.

**About SCM**

Since 1991 Safety Compliance Management, Inc. (SCM) has provided cost-effective programs to handle environmental health and safety concerns for clients in construction and general industries. SCM specializes in written program development, compliance, site inspections, training (both web-based and traditional), and emergency response. SCM’s professionals have a diverse experience in environmental health and safety, offering clients an unparalleled knowledge of the industry.
